

# M-FTA Array

Made for Installations.  
For every scene.

# Clarity counts.

**For every space where intelligibility, even coverage, and unobtrusive design matter.**

M-FTA and M-FTA MAX are a new generation of compact installation line arrays. Purpose-built for fixed installations, they blend discreet aesthetics with the unmistakable SE sound—clear, natural, and consistent. From theatres and auditoria to sports arenas, houses of worship, and studios, both systems deliver reliable speech intelligibility and homogeneous coverage across every seat.

**Hear every word.  
Feel every moment.  
Discreet by design.**

## Part of staging.

### Even coverage

**SE signature sound** — natural, articulate, and even-scaled for longer throws and wide seating areas. Ideal for speech and musical clarity.

### Compact flexibility

Discreet and robust to blend into any architecture. Easy, secure rigging makes setup quick and safe, with high workflow flexibility.

### Worry-free operation

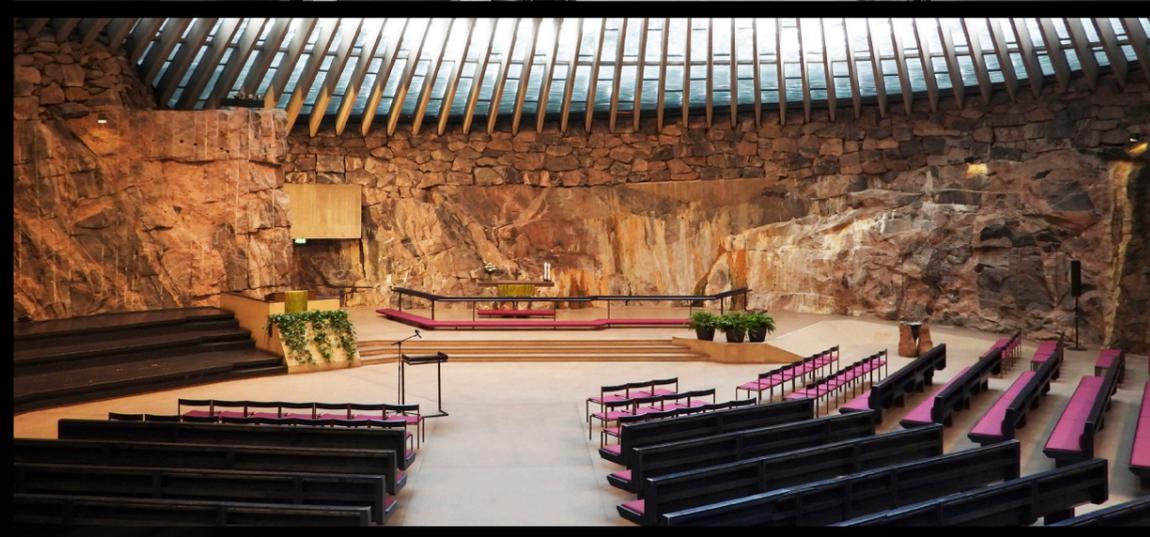

Easy cabling, no confusion — no external amps or complex controls. Simple, repeatable settings deliver consistent results and worry-free daily operation.

Designed to disappear.

# Built to perform.

Created for spaces where audio quality and architecture matter equally. With a **front surface scarcely larger than an A4 sheet**, each module stays discreet, preserves sightlines, and blends seamlessly into any setting.

Available in dark and white — and, for M-FTA, an additional **refined gold finish that complements many theatre interiors** — both systems integrate harmoniously across styles, from contemporary design to historic elegance.

For every style and space  
M-FTA available in three colours

## M-FTA

Compact cabinet and discreet design.

Suited to small to medium applications.

8 × 2.8" midrange driver

8 × 1" tweeter

8.1 kg

700 W Class-D

Ground stack with M-FXA subwoofer

Bass extension with M-FXA FS

Bass array expansion (cardioid and end-fire) with M-FXA and B-Line subwoofers

## M-FTA MAX

High output and long throw.

Suited to medium to large applications.

16 × 2.8" midrange drivers

8 × 1" tweeter

12.2 kg

1,000 W Class-D

Ground stack with B-Line subwoofers

Bass extension with flown subwoofer B 15A FS

Bass array expansion (cardioid and end-fire) with B-Line subwoofers

# Ready for the show.

Thanks to Plug & Play, the **M-FTA line array** is ready fast. In any venue, it's easy to use and delivers a first-class result in no time. With just two controls, the system adapts effortlessly to every challenge.

- 1 Connect mains
- 2 Connect audio
- 3 Power on
- 4 Select number of units
- 5 Set level

## Easily scalable.

The **M-FTA line-array system** is modular and scalable. From intimate stages to large exhibitions, it adapts to every brief. **M-FTA and M-FTA MAX** pair seamlessly with SE AUDIOTECHNIK subwoofers, creating ideal conditions for larger setups and demanding tasks.

From small groups..

M-FTA

...to thousands of listeners.

M-FTA MAX

Flown or ground-stacked, your choice.

# Bass that fits the show.

## B-Line (B 15/A | B 15A FS)

Compact, powerful, and easy to handle. The 15" models deliver impressive output for their size and are ideal when space is tight. Choose the self-powered B 15A for plug-in simplicity or the flown B 15A FS to keep the floor clear.

## B-Line (B 18/A | B 21/A)

The sweet spot for depth and punch. With extended low-frequency reach and confident SPL, the 18" and 21" models underpin speech and music in larger rooms. Available as passive or self-powered, they support cardioid and end-fire arrays for clean, controlled bass.

## M-Array FS (M-FXA FS)

A slim, flown bass module that adds rich, deep extension where floor subs aren't an option. Dual custom woofers in a discreet enclosure, with self-powered electronics and smart presets to speed setup with M-Array arrays —compact looks, convincing low end.

## M-Array SUB (M-FXA SUB)

Installer-friendly self-powered subs for M-Array. Onboard power and processing with intuitive presets (including cardioid and end-fire), plus a secure SE stacking system for fast, tidy builds. They're as discreet as they are capable.

Great sound needs a solid foundation — but every space is different. Our **B-Line** and **M-Array** subwoofers give you flexible, scalable low-end for installs of all kinds. Cardioid or end-fire, flown or ground-stacked — pick the configuration that keeps energy on the audience and performance.
