Small cabinet.

Whether in small rooms or large halls, for fixed or changing installations, as a groundstack or flown system – the **M-F3A PRO line array** is your reliable partner you can count on.

Despite its small size, this perfect companion offers an incredibly powerful “signature sound” for any occasion.

Huge performance.

Ultra-compact self-powered line array system that offers ultra-clear sound reproduction with studio-quality mids and highs due to its hornless design.

The integrated Class D power amplifiers with switch-mode power supply ensure maximum performance with minimum weight. The integrated rigging system and the intuitive operating concept are easy to use. This way you are well-equipped for any situation.

**Set up.
Switch on.
Get started.**

Handy weight
of only 8 kg

There is no better way to define sound.

The **M-F3A PRO system** offers an impressively homogeneous sound dispersion and a signature full and rich sound. In a footprint just the size of an A4 sheet of paper are 8 highly efficient 2.8-inch neodymium midrange drivers and 7 effective 1-inch dome tweeters. You've never experienced speech and music so clearly.

Turns sound into an experience.

Experience
the size now.

The base area
of the front is just
as large as a
DIN A4 sheet
of paper.

- 1 Connect the power cables
- 2 Connect the audio cables
- 3 Switch it on
- 4 Select amount of M-F3A PROs
- 5 Set volume

Immediately ready for use.

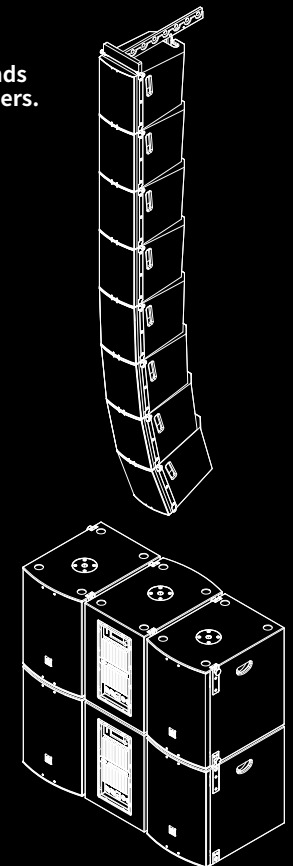

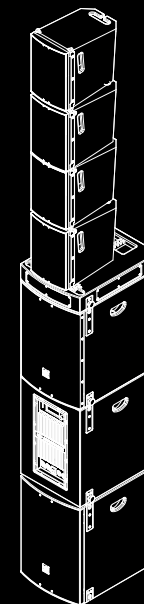

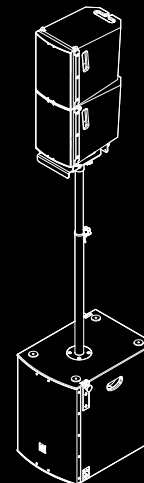

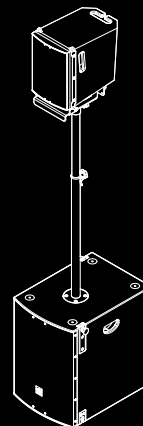

Plug & Play, the **M-F3A PRO system** is ready for immediate use. Whether for installations or mobile sound reinforcement, the **M-F3A PRO line array** is designed to be easy to use and always deliver a superior listening experience. With just two controls, you can adapt the system to the environment and the application.

Easily expandable.

The **M-F3A PRO line array system** is modular and scalable to any size. Events and installations for smaller groups or a crowd of several thousand listeners are no problem. The **M-F3A PRO modules** can also be easily combined with the **M-Line-** or **B-Line-subwoofers**.

From small crowds ...

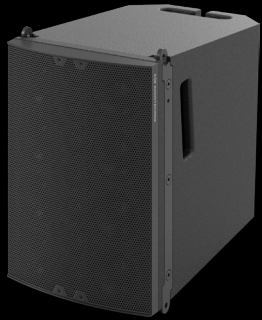

... to thousands of listeners.

The M-Line

Perfectly equipped.

Each **M-Line element** is designed and manufactured by **SE AUDIOTECHNIK**. The unique features and carefully matched product portfolio allow you to operate and scale the system with minimal effort and resources. The easy handling and the customized amplifiers with ready-to-use DSP settings guarantee super-fast and persuasive results. Our **M-Line speaker** systems are available in both black and white.

M-F3A PRO

Ultra-compact self-powered 2-way line array element with hornless design.

M-F3A FS

Flyable bass extension module with integrated amplifier and DSP.

S12 PRO

12" System subwoofer with integrated amplifier, DSP and 2-point rigging system.

S15 PRO

15" system subwoofer with integrated amplifier, DSP and 2-point rigging system.

B-Line

Our subwoofers for even more bass.

Good sound needs a powerful base. But every application is different and needs to be addressed individually.

That's why we developed the **B-Line** into one of the most comprehensive and versatile subwoofer series on the market. Whether cardioid or end-fire setup, whether installation or mobile sound reinforcement, whether ground stack or flown line array – the **B-Line** provides the right **Boooom**.

15" – The Space-Saver

The most outstanding feature of the models with a **15" woofer** is their **easy handling** during setup and transport, combined with **impressive output performance** in operation. By the way, this 15" subwoofer is available not only in the **passive version B 15** and the model **B 15A with integrated amplifier and DSP** but **also as a flyable version B 15A FS**. Thus, you can have **real bass** even in a flown system.

Size	15"
Voice Coil	3"
max. SPL	up to 136 dB
Load Capacity (passive)	1,600 watts peak
Power (self-powered)	800 watts Class-D Amp

18" – The Golden Middle

The **18" woofer**, in combination with the strong **4" voice coil**, achieves **up to 138 dB max SPL** and reaches **down to 29 Hz**. The passive **B 18** can handle **up to 2,400 watts (peak)**, and the **B 18A with an integrated amplifier and DSP is driven by 1,600 watts**. **Ergonomically optimised handles** on each side ensure quick and safe transportation and setup of the subwoofer.

Size	18"
Voice Coil	4"
max. SPL	up to 138 dB
Load Capacity (passive)	2,400 watts peak
Power (self-powered)	1,600 watts Class-D Amp

21" – The Full Load

The **massive 21" driver** with its powerful **5" voice coil** rumbles with **up to 142 dB max SPL** down to the **deepest depths – from 26 Hz**, it is the bass authority in our line-up. Handleable **up to 4,000 watts (peak)**, the B 21 delivers enough power for **grand setups**. Despite its higher weight for maximum operational stability, it is easy to manoeuvre thanks to the two **conveniently placed handles** on both sides. Our largest subwoofer model is **also available with an integrated DSP power amplifier**, just like all B-Line models.

Size	21"
Voice Coil	5"
max. SPL	up to 142 dB
Load Capacity (passive)	4,000 watts peak
Power (self-powered)	1,600 watts Class-D Amp

Perform everywhere.
